Mission Statement

- To provide accessible, acceptable, culturally appropriate, affordable, high quality, non-judgmental care.

- This care shall include both comprehensive and episodic primary medical, dental, and mental health care services.

- These services shall be provided by a professionally competent, multi-disciplinary and multi-cultural, community-based staff.

- These services shall be provided primarily to economically disadvantaged, underserved, and high-risk populations in ways that are consistent with a prototypic model of a community-based, health care delivery program.

- To facilitate education and research in the community in ways that will benefit patients, consistent with the Clinic’s place in the organization of the University of Minnesota.
